WELDED WIRE

Thank You for your interest in our products and for giving us an opportunity to be your wire supplier! **Klubertanz Equipment** is a nationwide distributor for Riverdale Mills wire manufacturer, stocking over 1,500 rolls of welded wire. We carry only brands that are cage-quality material. The quality of these brands and the accuracy of the dimensions are higher than many of the brands that you may find locally. **Any Questions?** Please feel free to call us on our toll-free line; we will be glad to help you.

TYPES OF WIRE MESH AND FINISH

GALVANIZED BEFORE welding is an economical mesh. The galvanizing is damaged at the joints during the welding process. Thus, the material rusts more quickly, which decreases the life of the product when compared to the Galvanized After wire.

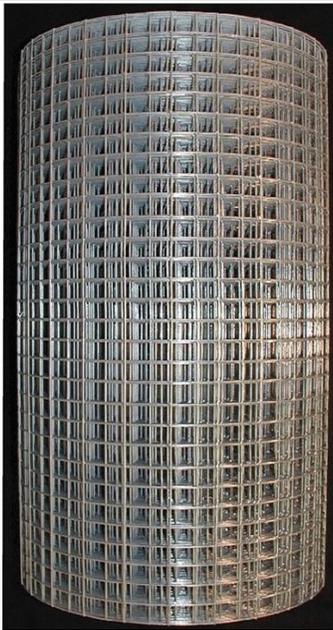

GALVANIZED AFTER welded wire is dipped after it is welded, providing a seal of zinc and galvanizing over the joints. This makes the mesh somewhat harder to cut & straighten, but at the same time, it is more supportive & stiffer. The wire used in our Galvanized After welded brands typically is made from a stiffer and stronger steel.

REMEMBER

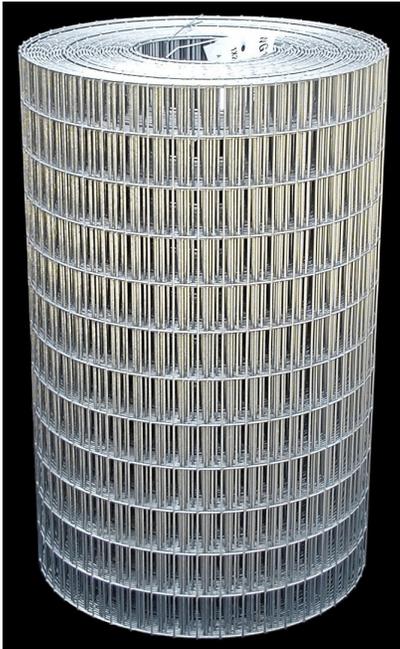

On all wire, the last measurement goes around the roll. 1/2" x 1" mesh has a wire pattern that will produce 1 inch of waste per cut. A 1" x 1/2" pattern will produce 1/2" of waste per cut that must be trimmed to eliminate sharp ends. And in 1" x 2" mesh you lose 2" per cut!

CAGE-MAKING SUPPLIES

WIRE BENDERS

Here is a sturdy wire bender on legs that is light enough to be portable. Legs are constructed of heavy steel pipe. Two levers on top clamp down on the wire to hold it securely when bend is made. Wire is bent on a 3/16" radius to prevent the wire from cracking, as is often the case when sharp bends are made.

AUTOMATIC WATERING SYSTEMS

Edstrom Flex Tube System

The superior quality and versatility of the Edstrom Flex Tube System mean it can tackle almost any small-animal automatic watering needs. Edstrom valves and accessory components make do-it-yourself installation simple and practical. For **water supply**, use an A225 Filter and Pressure Control Kit, an A204 or A604 Regulator, or an A203 Float Valve Tank. Run a **distribution line** to your cages and mount a pipe section so the valves are slightly above standing height for the animal (8 to 9" above floor level for rabbits). Debris in the water supply - rust flakes, scale, silt, etc., is the major cause of valve leakage. For safety, an **upstream In-line Water Filter** (A206) is recommended.

Guinea Pig and Mouse Valves by Edstrom®

Rugged stainless steel construction. The outside cylinder protects the stem from certain animals that like to play with the nipples and create an excessive waste of water. These valves have Variflo® technology that allows adjustment of water flow by turning the nipple clockwise into the outer valve housing.

Monoflo® Stainless Water Valves

- Chew-proof stainless construction
- Ideal for rabbits and poultry

The weight of the upper stainless valve seat is engineered to rest firmly on the top of the valve body, thus cutting off the water flow. This design eliminates the need for a spring or diaphragm to regulate water flow.

A600

Valve installation must be vertical! (Perpendicular to the cage floor). For mammals that chew, place 1/2" PVC between back-to-back cages. Cut a 3"W X 6"H hole for valve access. Use a separate valve for the back side cage.

Do not install PVC pipe inside the cage with rabbits. You will have chewing damage to the pipe.

- ## INSTRUCTIONS
- Determine the **zone** for the **shipping address** from the table in the inside of the back cover.
 - Estimate the **weight** of your package(s). Remember that your estimations are just that, as packing material, grouping, and weight/size limitations may affect the number and weight of packages.
 - We strongly recommend that all mail orders are phoned in first. We easily can accurately estimate the shipping, and then tell you the dollar amount necessary for your payment.
 - We will do our best to pack your order in the **safest** and most **cost-effective** way.
 - For packages over 70 lbs, contact us for costs.
 - For shipments over 130 lbs, contact us for costs.
 - Pay attention to any of the **additional fees and charges** assessed by UPS listed at the bottom of this page.
 - Shipping charges are subject to change, due to possible changing UPS regulations, costs, and/or fuel surcharge fluctuations.
