

CAGES AND HUTCHES

P-Series Pet Cages

HP50

This unique design combines the convenience of a slide-out tray with the cleanliness of a "set-in-tray" design, where the cage sits inside the tray and the tray's side walls are higher than the wire floor. This is accomplished as the cage sits on a galvanized steel support frame, which allows a plastic Dura Tray to slide out for cleaning. The steel frame acts as a urine guard, preventing urine from getting past the tray.

The sides are constructed of 1" x 2" 14-gauge zinc/aluminum finish. The top and door are constructed of 2" x 1" 14-gauge galvanized before welded wire. The 18" x 24" cage includes the smaller 1/2" x 1/2" 16-gauge galvanized after welded floor panel, which is ideal for very small breeds. The larger 24" x 24" cage includes a 1" x 1/2" 14-gauge galvanized before welded floor, which is ideal for medium to larger breeds.

We offer a 5% discount on cages for any order including \$400.00 or more of any cages.

Cages are fully assembled. Feeders not included.

18" x 24" x 15" Cage. Oversized package: Requires minimum shipping charge of a 57 lb package. **Stock no. HP50\$55.10 ea.**

24" x 24" x 18" Cage. Oversized package: Requires minimum shipping charge of a 84 lb package. **Stock No. HP51\$63.40 ea.**

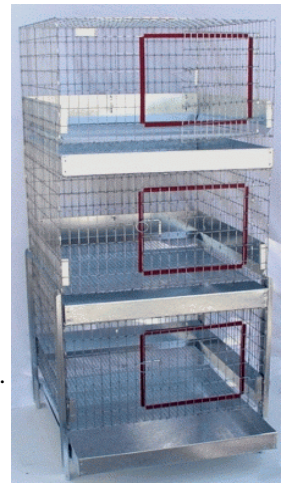

J-Series Multi-stacking Hutches

Make efficient use of space with these stacking units! All **sidewalls** and **tops** are constructed of 2" X 1", 14-gauge galvanized before wire. **Dividers** are made from 16-gauge wire mesh. Cages with 14" compartment height have 16-gauge **floors**. Cages with 18" compartment height have floors constructed of stronger, 14-gauge mesh. All units include 2 1/2" high plastic Dura-Trays, and a set of steel **support legs**. The trays for the upper tier rest on the top panel of the cage compartment underneath.

These stacking units **cannot be shipped** pre-assembled, so orders for shipment will be sent unassembled. Although a supply of J-clips are included, a J-clip pliers will be required for assembly, and a ringer will be required for installing any dividers substituted to solid poly divider panels.

Not all cage sizes are held in stock, so allow time for cage construction after you place your order. Blue polyethylene solid dividers are available upon request.

Ordering instructions: To order, locate the Base Stock Number in the table below of the desired cage. Complete the Stock Number by adding the variety code (F, G, S, or T) after the Base Stock Number. For example, an HJ5G cage would be a 30" X 36" cage with 3 compartments per tier, unassembled, and with urine guards. Note any additional variations from the base models on the order. J-series cages can be modified to accommodate a wide variety of uses.
