

# AUTOMATIC WATERING SYSTEMS

## Edstrom Flex Tube System

The superior quality and versatility of the Edstrom Flex Tube System mean it can tackle almost any small-animal automatic watering needs. Edstrom valves and accessory components make do-it-yourself installation simple and practical. For **water supply**, use an A225 Filter and Pressure Control Kit, an A204 or A604 Regulator, or an A203 Float Valve Tank. Run a **distribution line** to your cages and mount a pipe section so the valves are slightly above standing height for the animal (8 to 9" above floor level for rabbits). Debris in the water supply - rust flakes, scale, silt, etc., is the major cause of valve leakage. For safety, an **upstream In-line Water Filter** (A206) is recommended.

A102 valve & A108 valve clip
