

AUTOMATIC WATERING SYSTEMS

Edstrom Flex Tube System

The superior quality and versatility of the Edstrom Flex Tube System mean it can tackle almost any small-animal automatic watering needs. Edstrom valves and accessory components make do-it-yourself installation simple and practical. For **water supply**, use an A225 Automatic Pressure Control, an A205 Commercial Regulator, or an A203 Float Valve Tank. Run a **distribution line** to your cages and mount a pipe section so the valves are slightly above standing height for the animal (8 to 9" above floor level for rabbits). Debris in the water supply - rust flakes, scale, silt, etc., is the major cause of valve leakage. For safety, an **upstream In-line Water Filter** (A206) is recommended.

CHEMILIZER MEDICATOR

Pumps Are Not All The Same. The Chemilizer pump motor has a diaphragm. This prevents wearing of the piston and the cylinder walls, which causes inaccuracies in metering, a major problem in low-flow systems. Minimum water flow required is 24 gal/day. 2-year factory warranty. Ship. Wt. 6 lbs.

Stock No. A888.....\$265.50 ea.

Designing An Automatic Watering System?

Please feel free to call us regarding your watering needs and plans. We'd be glad to help you design a reliable system that fits your needs.

DEW DROP VALVES

This drip-proof valve does not depend on water pressure for stem seating. It is spring-loaded and will not drip at zero water pressure. Now with a stainless steel stem for longer life. Each component is machined to strict tolerances for trouble-free operation. Neoprene O-ring seal assures positive drip control. Standard 1/8" MPT body thread for installation directly into galvanized pipe or use with our PVC pipe saddles or couplings with 1/2" PVC pipe. Ship. Wt. 3 lbs / 100

Stock No. AD20.....\$2.04 ea..... 100+ @ \$1.75 ea.

Lixit® Model L-70 Automatic Dog Waterers

- The only center flow nipple
- Ideal for dogs & other animals
